

NOGI

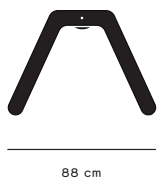

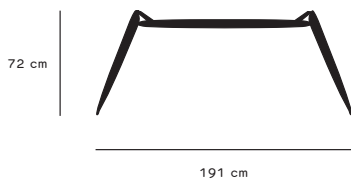

Material
steel, inox

Colours

NOGI is a unique construction for tables. It can be produced in different shapes and sizes in different kinds of metals. The standard table construction applies for the maximum table top's length of 2m. For

longer boards we are able to customize the FiDU legs accordingly to produce a more durable product. The table tops need to be purchased separately.

Raw lacquer steel version products are designed to have an industrial look so they can have few scratches or rust stains on a surface underneath the lacquer.
